

Note : Please consider the flows only which are documented here in doc, rest functionality is done but testing and ux in progress. By this Sunday with all feedback most of the things should be done.

<http://pin.innovationguru.in>

Site is slow on this basic server will take some medium plan and some some production build site up, site will be really fast @Nishant

Users for testing : pwd: for all nishu123

1. nishusaxena@gmail.com (Normal User)
2. nishu.saxena@gmail.com (Superuser)
3. nishusaxen.a@gmail.com (Expert , can share)

A. Registration Flow

1.Registered

Family Office : Innovation Guru

Name : **Nishant Saxena**

Username / Alias : nishu

Street Address , City , Country : Dharam Karan Road , Hyderabad , India

Email : nishusaxena@gmail.com

Phone : 9032092000

Member Type : Family

Interests : Topic listed in CMS

Nominated By : Hansi

Others: Interested in knowledge sharing

Password : nishu123

Questions / Discussions

@Hansi : Is tooltip type messages better.

@Hansi : Is it good to have tooltips

@Nishant: Layout css based to fit content

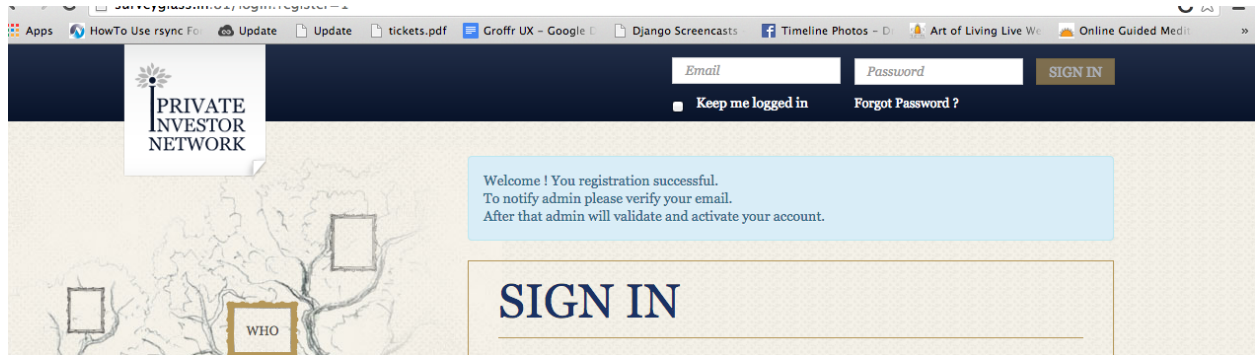

Login via username / password.

@Hansi : Is Alias / Username is fine.

@Hansi : Please verify all the error messages if they are fine.

@Hansi : Is confirm password required.

2.User redirected to login page after registration with message

Questions / Discussions

@Hansi : What should be the message

@Rohan : Give me a good design for this (better suitable color)

@Hansi : Should user be allowed to login via email also.

3.User receives an email and he clicks verification link

Dear Nishant Saxena,

Welcome to Private investment network ! >>>> Please click the following link to activate your account.

[Activate your Account](#)

Or copy paste this link on in your browser

<http://pin.innovationguru.in/user/5513e4a257614d2e3c00d0cf/verify/58f3ffbe666e64c4cca19bb2fbcfeab>

* After you verify admin will validate and activate your account.

Thank you

Team PIN

Questions / Discussions

@Hansi : Provide the mail content , subject and from .

@Rohan : Provide a template design fro it.

Until user will not verify his email he would not be able to login

☐ Keep me logged in [Forgot Password ?](#)

EMAIL VERIFICATION

Your email verification done successfully.Now please wait for admin approval.

4. Unverified user tries login

SIGN IN

Email not verified

☐ Remember me

[Don't have an account! Sign Up Here](#) | [Forgot password](#)

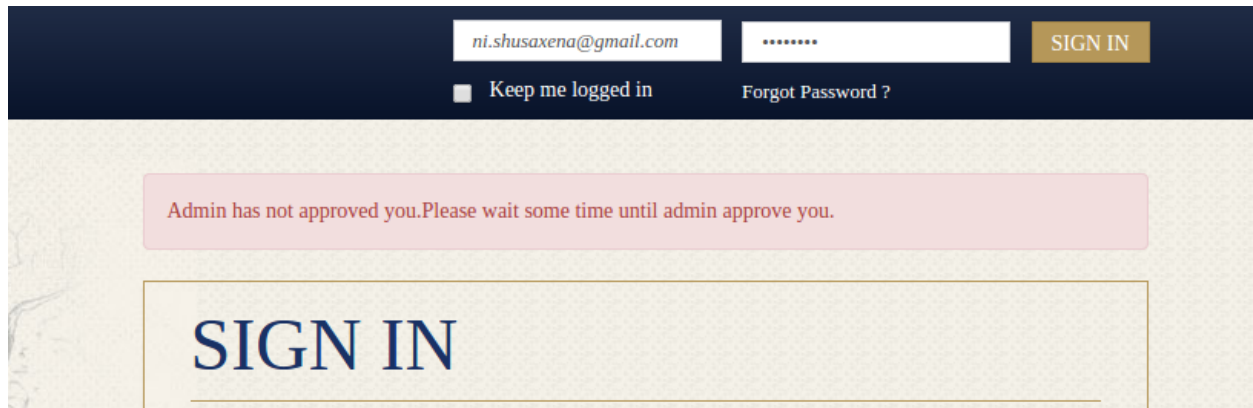

@Hansi : What should be message here

@Rohan : Here should be a notification page..

@Nishant: On notification page , who is trying to login , amil should be sent to admin. so he can take action accordingly.

@Hansi: Also I think on notification page user should have ability to send mail, what say (the mail id , should be sent explicitly, but it could casue junk as well , so we can control it by tracking how many mails are sent etc. (Later))

4. User verifies and try login

The screenshot shows a login interface with a dark blue header. In the header, there is a text input field containing 'ni.shusaxena@gmail.com', a password input field with masked characters '*****', and a 'SIGN IN' button. Below the header, there is a checkbox labeled 'Keep me logged in' and a link 'Forgot Password?'. A pink message box in the center states: 'Admin has not approved you. Please wait some time until admin approve you.' Below this message is a large box with the text 'SIGN IN' and a horizontal line underneath it.

@Hansi what should be message.

@Nishant : Admin should get the notification.

Later we can whatsapp on this event to admin. or also to others like attack on site

5. Admin approves the user

@Hasnsi: A mail will be sent to user please provide content for welcome mail

@Rohan: Please provide the template and @Hansi please approve it.

//Test user accounts and special test cases TODOS ([special test cases later)

1. Email not verified : n.ishusaxena@gmail.com pwd: nishu123 alias: nishu1
2. **[special test case 1.** nishu1-> nishu2 for above , when not verified its changed (**Also test its changed not a new entry**), what if admin not approved or what if user is approved by admin. Solution : Only 3 states enum , for state 1. => override all | for state 2 no updates only admin will approve and send mail to admin | 3 => user / email both not available. For all 3 states consider username and email both as we have two unique identifier.
3. **Special test case 2.** When user update his alias name or in case email @Hansi ?? the not exist should be tested] @Nishant : Write a function which takes two params (i).userdict or object and update add etc.
4. Admin not approved ni.shusaxena@gmail.com pwd: nishu123 alias: nishu1
5. Page not found <http://pin.innovationguru.in/404> @Rohan Please provide psd. @Hansi please approve it.
6. **Special test case 3. USeR tries to login and repeatedly click the login box , or other scenario via tool , attack on sit (Throttling/IP restriction) @Hansi: Chinese IP could be restricted or if ip is from there redirect to other flow verify and then allow.**
7. **Proper configure site and work environment (Take m/c from singapore so latency low, and othe lots of configuration etc.)**
8. **Special test case 4.Is username case sensitivity checked ?**

BUGS:

- Email Ver. login=> Why extra fxn login.
- Password is incorrect message lets a user know if some email is a member of pin, against business requirements.
- Approvel (spelling mistake) when click verification link)
- <http://pin.innovationguru.in/register> when login, I can see the register page.
- Apply the proper css provided by Dhruv (Later Not now .. when high priority task ends)
- When admin approve the user a welcome mail should be sent to user
